

## Introducing our pHOenix XL Module Replacement Program!

Part number /36-0031X

The pHOenix XL module must be replaced each year with a new pre-calibrated module. The next time you need a new module, consider this new service plan. When you enroll, modules are replaced as needed free of charge anytime during the offer length. With the 2-year option, you will save at least 25% off the cost of purchasing individual modules at full price each year. With the 3-year option, the savings are at least 30%. Compare this to the retail cost of a single replacement module at \$489!

Plan Length	2 years	3 years
Amount Due (price includes a new module)	\$734	\$1,027

To enroll, visit

Terms & Conditions: Modules are replaced as needed free of charge anytime during the offer length. Each plan covers the modules for one meter. If your location has multiple pHOenix XL meters, a plan is needed for each meter, as desired. The two-year option will be effective two years from the date of purchase. The three-year option will be effective three years from the date of purchase.

FDA Class II Medical Device - Indications for Use: This device is designed for use by hemodialysis professionals to verify the conductivity, temperature, and pH of solutions in the hemodialysis setting. ©2023 Mesa Labs. All rights reserved.
